HEARING AID SUPPORTING SYSTEM

bajula 

...discover the sounds of your world!

HEARING AID SUPPORTING SYSTEM

To achieve the best results with a hearing aid many factors need to be optimal:

- early recognition • acoustic stimuli
- motivation • acceptance

Long durations of using the hearing aids are essential for the development of the hearing ability, the linguistic development, speech comprehension as well as for the active participation in communication.

“ Ease your life! “

No matter if you are playing, doing sports, during physical therapy or just in your daily life, the bajula-system is flexible and will protect and support your hearing aid. Regardless of age, physical status or hearing aid system.

- bajula is applicable for CI • aqua-systems
- hearing aids • bone conduction systems
- combined systems (e.g. CI+hearing aids) and many other systems
